Thanks for your interest in the bred heifers we are offering today!

The bred heifer business is, without a doubt, a long-term venture not unlike building a profitable cow herd.

We gain a little more appreciation and respect for this each year - don't get too high with the highs or too low with the lows. We haven't followed the "in and out" or "depends on the market" approach and have worked to develop heifers the right way... forage based with added attention to calm demeanor and structural longevity.

Our thought has been to focus on three areas in developing bred heifers to become long-term cows in the herd:

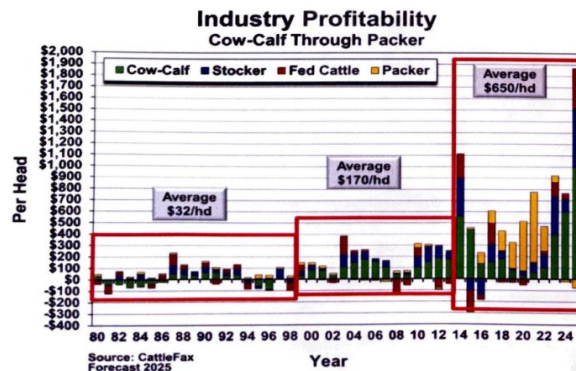

Longevity -grass and forage based, sound feet and legs, "built-in" body condition, maternal desire

Convenience -quiet and easy to be around, quality teats and udder, sensible size

Performance -calve, nurse and mother with no drama, grow fast and efficiently, timely rebreeding

We are confident that if our heifers do well in these three areas, they will have the greatest chance to be around in the cow herd for an extended time. Thanks again for your confidence in our program!

Cow-calf producers will continue to hold the most leverage in the overall marketplace. Modest heifer retention is prevalent but does not appear to be at levels to suggest rapid expansion. Profitable margin levels for this segment are generally expected to continue for the next several years. (Cattle Fax, 2025)

7

We've been very blessed as a family this past year. Michael and Margo were married in October and are building their life together in Ohio. Sam and Megan are expecting another child at the end of January and we're all excited for the second grandchild. Mathias continues to enjoy living and working in Brazil. Miranda recently stepped away from her role in Kansas City to join our family operation full-time.

Thank You! Peters Beef Genetics
Charlie and Jenni
Mathias, Michael, Samuel, Miranda

TAMA LIVESTOCK AUCTION
JANUARY 12, 2026

INFORMATION GUIDE

<u>Origin</u>	
Cramton	Cramton Ranch Hutchinson, KS
Reames	Reames Ranch Jamestown, KS
Tetrault	Tetrault Ranch St. Onge, SD Capitol, MT
Oelkers/Web	Oelkers Ranch Lacrosse, KS
Peters	Peters Beef Genetics Bellevue, IA

Preview of the 2027 bred heifer sale:

40 head of Tetrault Ranch heifers
 * reds, excellent quality
 40 head of Broken O Ranch heifers
 * reds & blacks; maternal
 30 head of Reames Ranch heifers
 * AN x; deep and thick
 30 head of Peters Beef Genetics heifers
 * our home raised top quality

**Be sure to join us next January, 2027
 at Tama Livestock Auction.**

Sires

Angus (ABS)

Magnitude calving ease with high growth
 curve bending genetics
 sound structure, great udders

2U66 proven calving ease
 deep bodied, easy fleshing
 highly maternal

Red Angus (ABS)

No Worries solid calving ease with
 low birthweight and growth
 long bodied, deep ribbed

Angus bulls from Peters Beef Genetics
 1/2 to full brothers of Hickok,
 Special Focus, Magnitude,
 and Fireball
 *maternal genetics are
 Fink and Gardiner breeding

Vaccinations

Apr '25	Virashield 6 Lepto/Vibrio Fly Tag Internal/External
Aug '25	Virashield 6 Lepto/Vibrio
Nov '25	Scour Bos 9 Internal/External
Jan '26	*at Tama Scour Bos 4

<u>Breed</u>	AN	Black Angus
<u>Types</u>	RA	Red Angus
	SM	Simmental

Heifers have been sorted and
 evaluated for disposition at weaning,
 breeding and ultrasound.

Ultrasound Due Date

Based on 276 days gestation
 *our average gestation on first calf heifers
 over the years has been right at 276 days;
 the window from earliest to latest for a
 particular date is +/- 7 to 10 days

Pelvic

Pelvic area in sq. cm at yearling age
 *along with small pelvic area, we cull
 any heifers with pelvic bone spurs or
 odd-shaped pelvic openings

Calf Sex

fetal sex determined at ultrasound

Nutrition

heifers have been receiving a mixed ration
 of 50:50 ground hay and corn silage with
 mineral mixed in the ration, along with
 free choice grass/alfalfa hay

Our heifers have proven themselves as cows for us time and time again. Pictured left above is a 5-year old cow sourced from the Slipke Ranch with a Hickok heifer calf at side. Pictured right above is a Peters home raised 6-year old cow with a Fusion heifer calf at side. Low birthweight daughters like these are the foundation for our calving-ease bulls.

In the fall of 2024, we seeded down winter rye on one of our cornstalk fields. This past spring, we were able to utilize the rye for grazing and provide a fresh place for cows to calve.

Miranda and Jenni were able to travel to St. Onge, SD this past October to help ship the Tetrault heifers. These red heifers have been a staple in our program for over 20 years. A big thanks to the Tetrault family for their hospitality and friendship!
